Use of digital technology in the recruitment of migrant workers

This research report shows that digital technology can play a significant role in making safe labour migration and fair recruitment a reality. It also gives valuable

recommendations for how to make this happen. Digital technology could be a game changer in migrant worker protection.

Public employment services (PES): Diagnostic tool and guide

Running a diagnostic is an essential first step in every initiative aimed to bring about PES organizational change and improvement. Using these guide and tool, PES organizations can

identify the areas where existing capacity effectively contributes to delivering expected results and where there are opportunities for improvement.

100 years of public works in the ILO

This book chronicles the breadth and depth of ILO's engagement in Public Works Programmes (PWP) over the last century. It describes the journey, the ideas and the innovations that have emerged in a shifting global economic,

Social, and political context. PWPs continue to be widely used and supported by the ILO and it is hoped that lessons that have been handed down will be useful in informing future policy-making and programme design.

From policy to results: Guidelines for implementation of national employment policies

These Guidelines aim to support ILO's Member States in designing and implementing integrated national employment policies. They suggest a comprehensive frame-

work of implementation and a range of tools and methodologies which covers the whole NEPs process systematically from policy design to policy results.
