

Harnessing digital(ized) economy to Social innovation : Alternative Platforms

Corinne Vercher-Chaptal, Laura Aufrère, Université Sorbonne Paris Nord

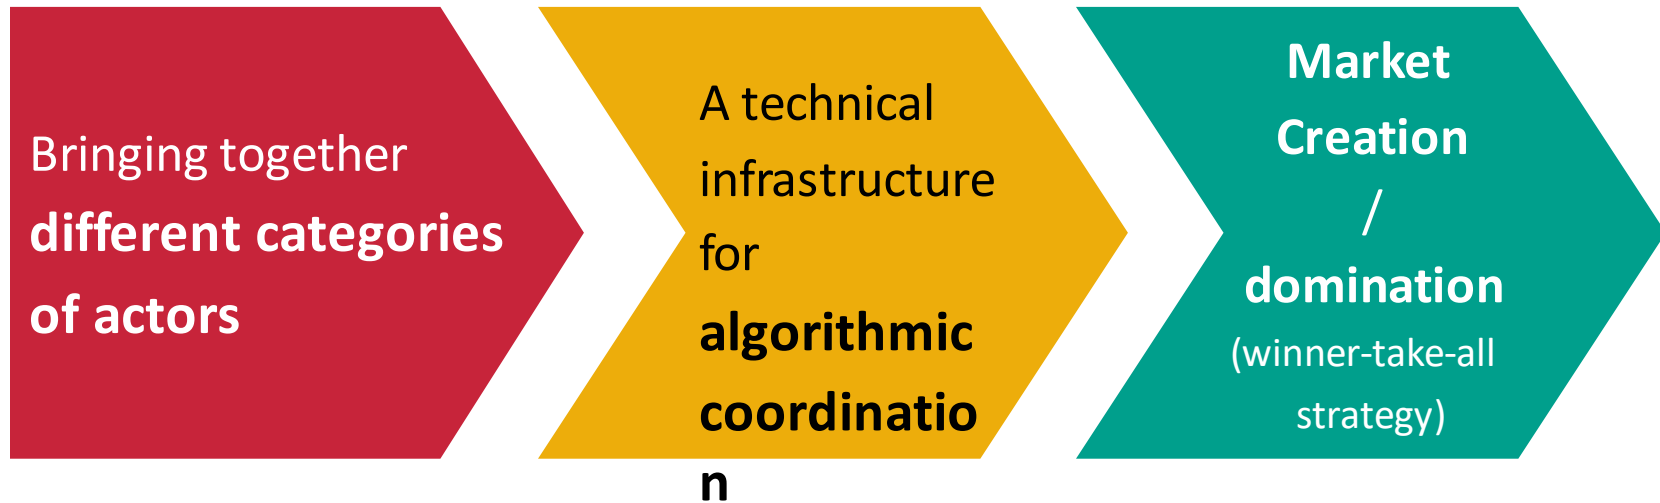

TAPAS
There Are Platforms
as AlternativeS

**ILO Academy on Social & Solidarity
Economy**
*SSE, Local Economic Development &
social innovation*

Elective 6, Session 1 - 23 of Nov.

3 key features of digital platforms

Digital(ized) economy : commodification vs concrete utopias

= *Uberization* of the economy : reinforce the commodification of the world

=> This actually fosters a **counter movement to protect society** (1):

- social and technical innovations spring out to organize "*concrete utopias aiming at expanding cooperation through new digital tools*" (Durand Folco, 2016).
- concrete experimentation, sort of prototypes of alternative platforms harnessing the digital economy to social innovation in order to meet the challenges of ecological and social transition.

The "double movement" is analyzed by Karl Polanyi in "The Great Transformation": "*in the same movement in which markets expanded, counter-movements emerged to control their expansion and influence*" (Polanyi, 1944 :24).

Alternative platforms contributing to social justice & the common good

Alternative platforms as tools serving the workers' interests:

- Rules and processes deliberated by the workers themselves (self-regulation)
- Abiding by the rules of Law (social & labour protection and regulation)

Alternative platforms as an attempt to provide a regime of “genuinely human work in humane conditions*” : “what are the rights of the workers to contribute to the meaning of the what they do?”

- Workers recover control over **the means & the meaning of production**
- Digital commons / cooperative platforms take up the mission of responding to general interest issues or helping specific categories of beneficiaries.

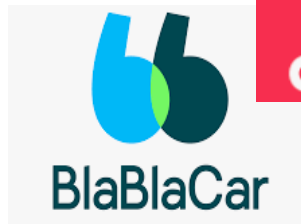

=> articulating protection and emancipation

*cf. Alain Supiot

Capitalist vs Alternative Platforms

Capitalist platforms

Winner-take-all aggressive strategy
Escaping social, environmental and
fiscal responsibility

Alternative platforms

Common principles of openness, ethical guiding,
sharing and reciprocity

Solidarity hospitality
(vs Tourism)

Free carpooling &
local transportation
solidarity
(vs Blablacar)

Ethical bike delivery
(vs Foodtech)

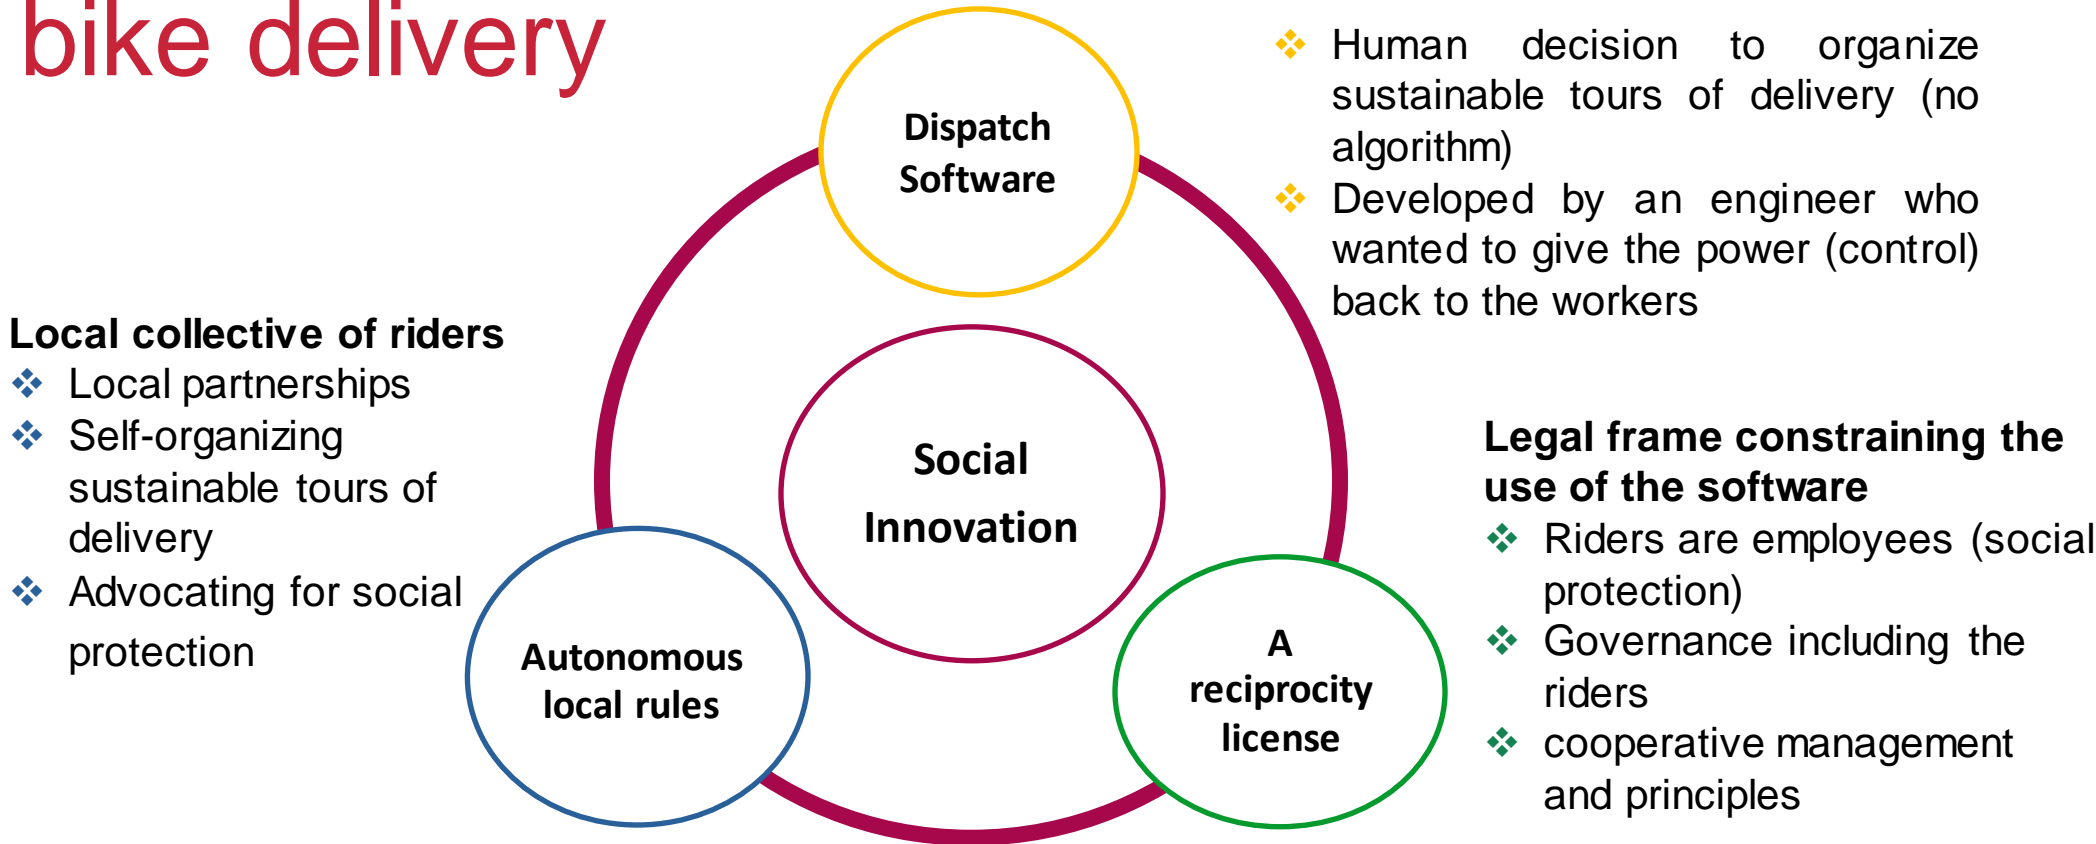

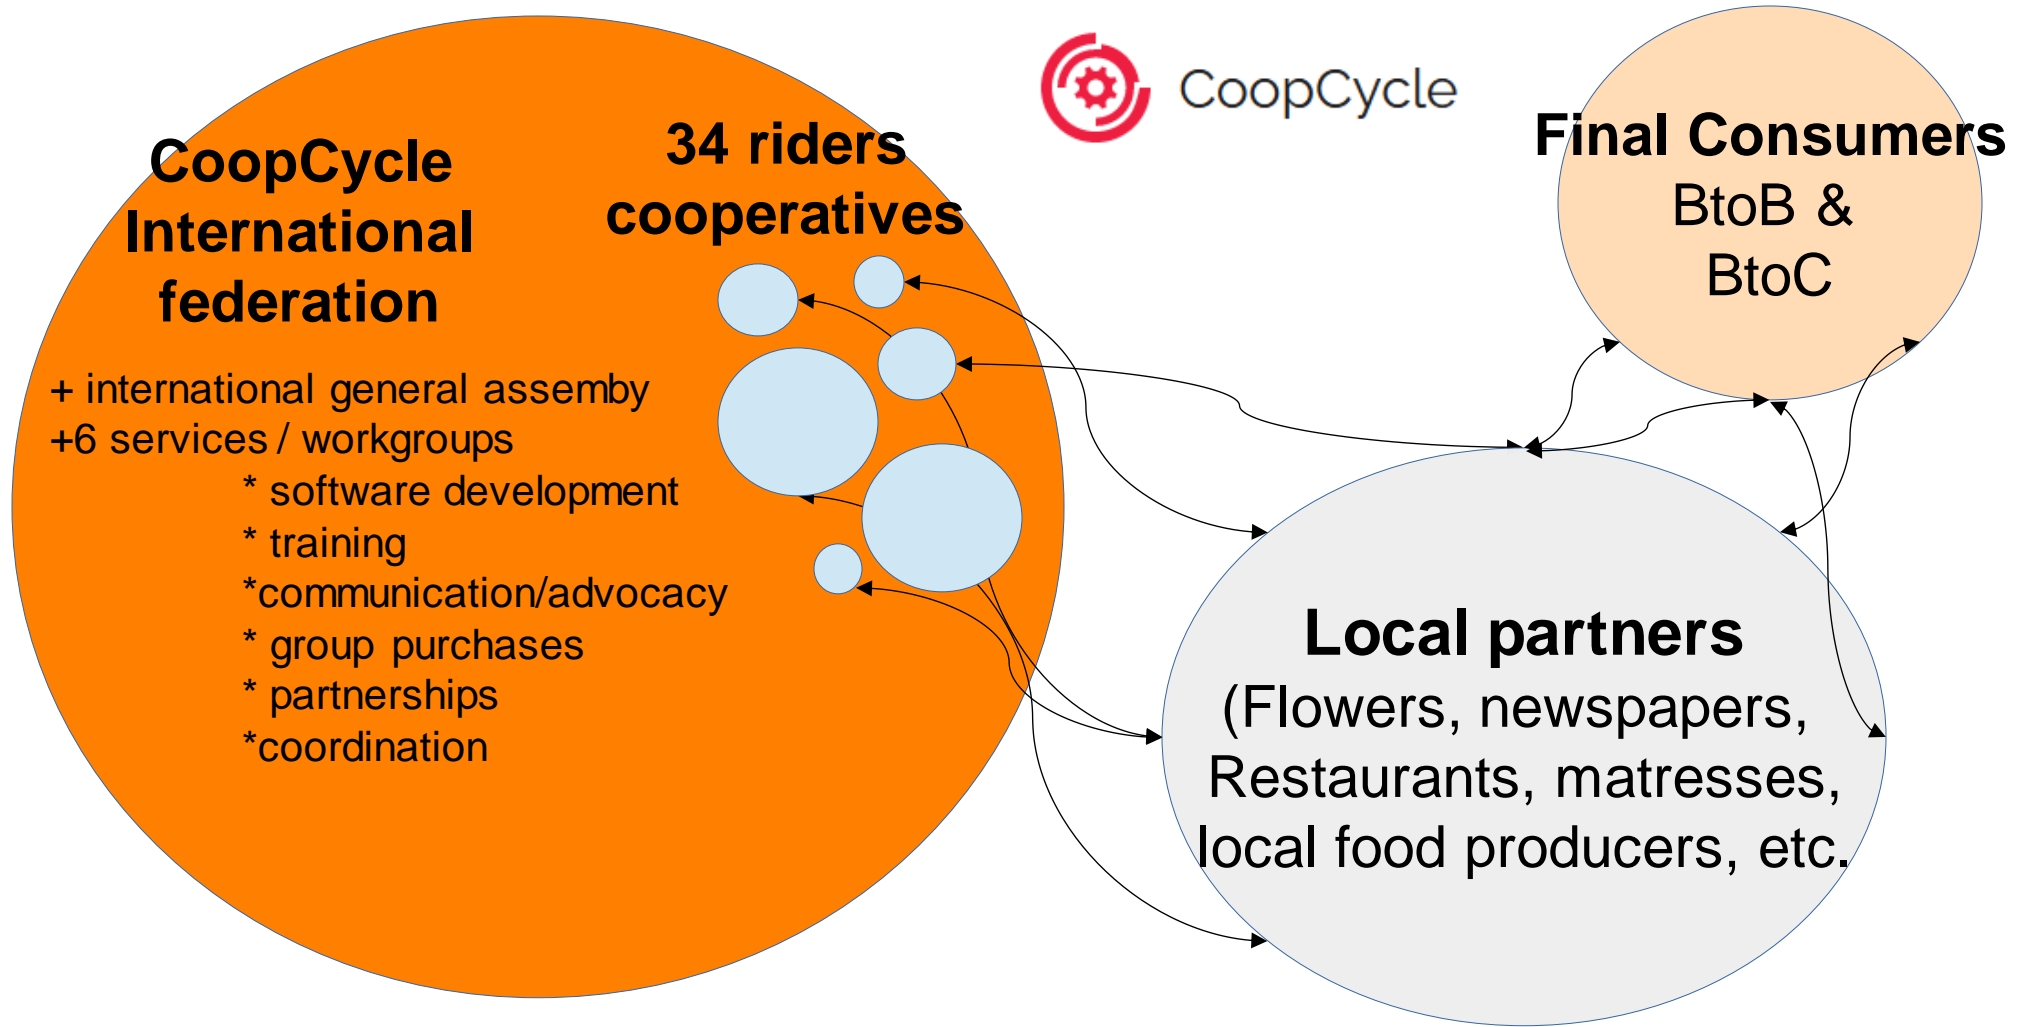

Digital market for local
food circuit

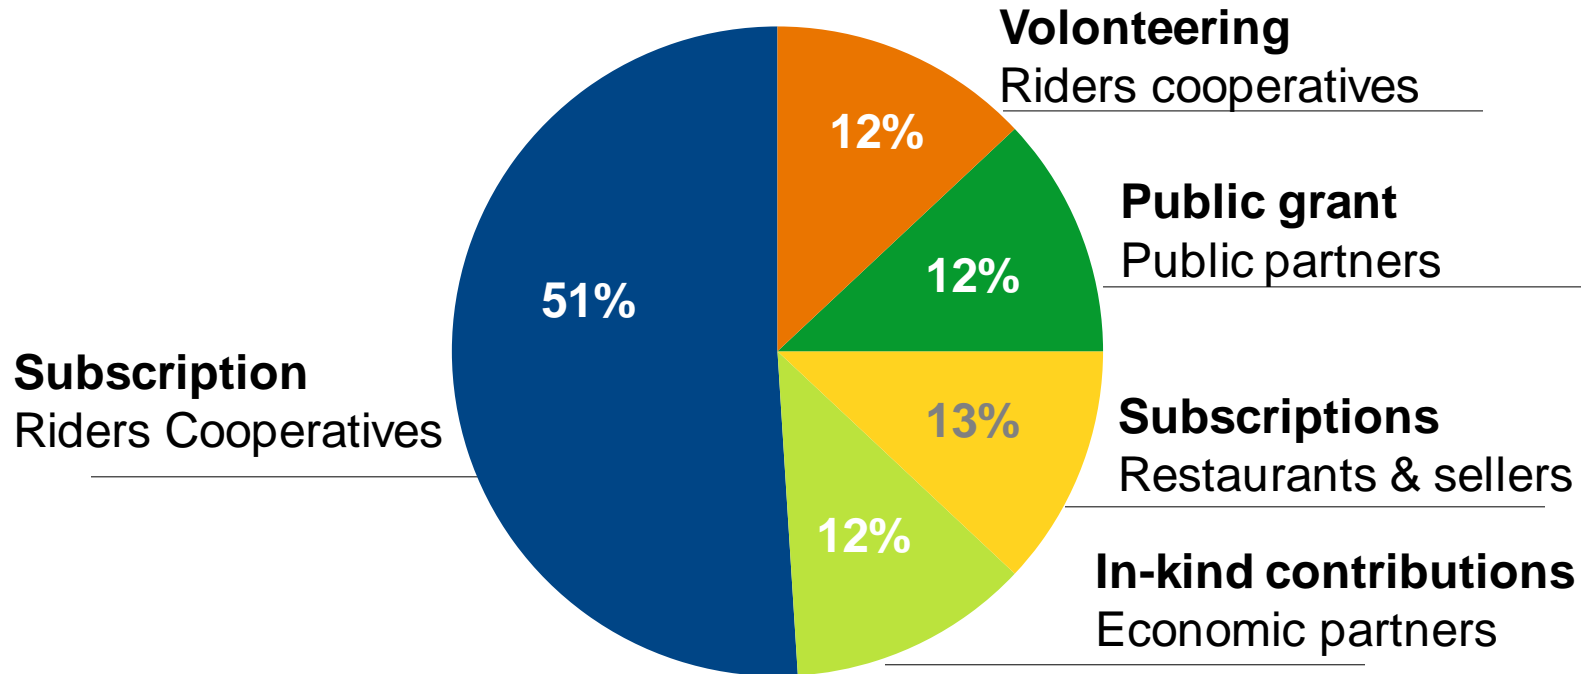

Popular education
and advocacy for
digital rights and
users protection
(vs GAFAM)

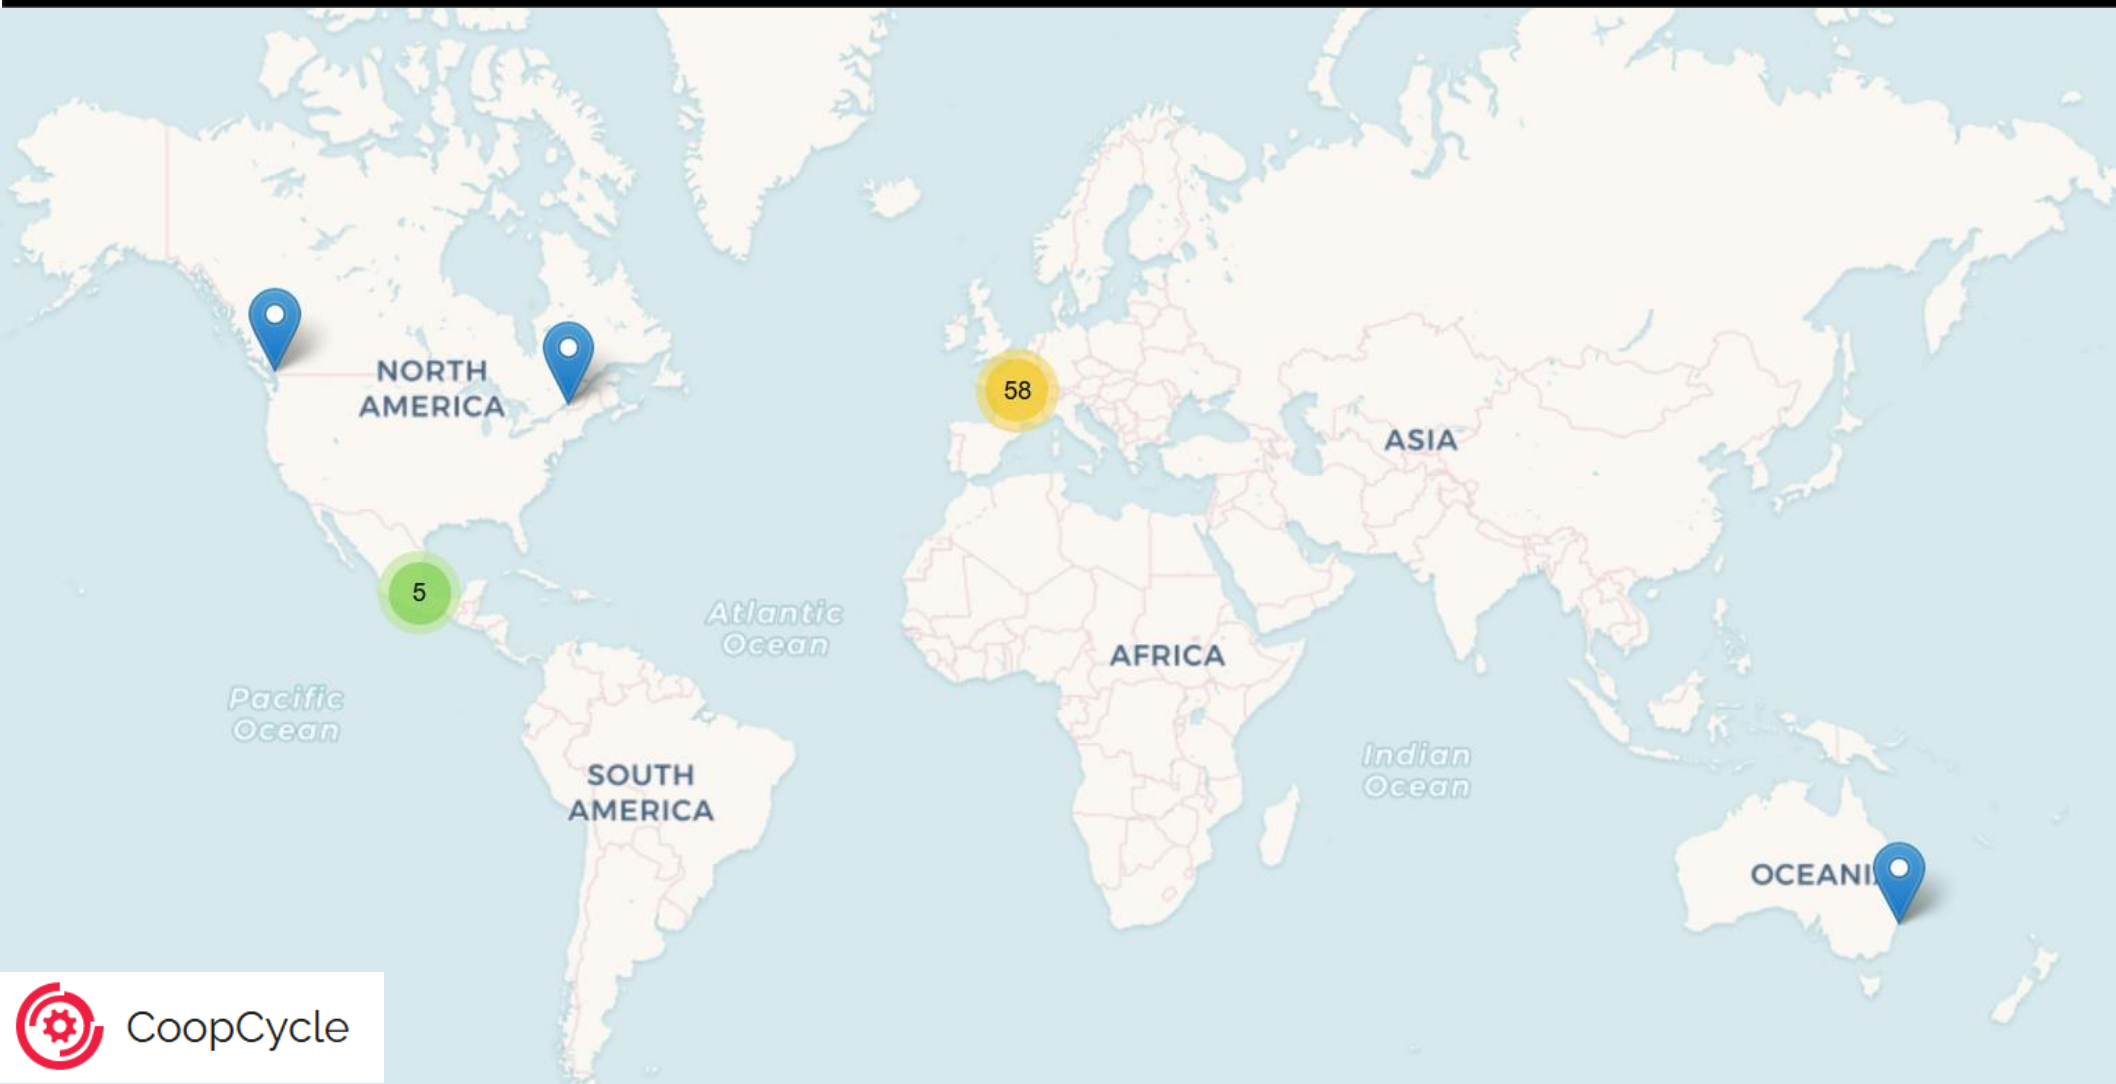

CoopCycle: an alternative platform for bike delivery

Economic model

Social innovation for social & environmental justice fostered by a grass-root initiative

- Re-definition of the “metier”
 - Riders turning into Experts in last miles urban logistics
 - Guaranteeing the workers dignity and protection
 - Offering a decarbonized service
- Addressing social & environmental justice issues
- Offering local level solutions / designed and supported by grass-root level initiatives

Thank you very much for your attention!
