Zero new HIV infections. Zero discrimination. Zero AIDS-related deaths.
Implement the ILO Recommendation on HIV and AIDS (No. 200)

“ We are becoming increasingly aware of the **inextricable link between HIV and TB**, and the urgent need to find ways to address them as co-epidemics, and finance such interventions. TB is the most common illness and cause of death for people living with HIV, and thus we need to focus on **formulating the right workplace policies and programmes that reduce stigma and encourage testing and screening for both infections.** ”

Chris Klopper

Vice-President: Finance, Federation of Unions of South Africa (FEDUSA)
