# ▶ ILO Voluntary Contributions for Development Cooperation

Annual Report 2020\*

\*Corrigendum report published May 2022

## Trends in ILO approvals in 2020

The ILO registered US\$ 357.6 million in total approvals in 2020, making it the third largest year for voluntary contributions in the past decade. This represents a 28% decline in contributions compared to 2019, which was a record setting year for resource mobilization at the ILO. In addition, the ILO received US\$ 17.6 million in Regular Budget Supplementary

### The Top 10 voluntary funding sources\* in 2020

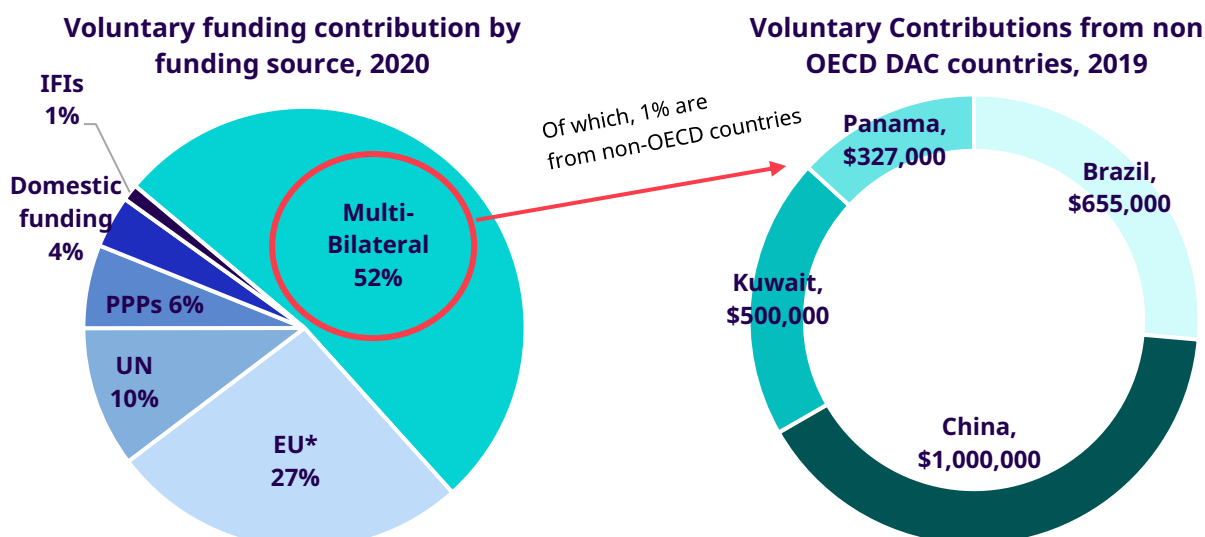

Development Partner	Budget Approved (US\$)
1. European Commission (EC)	\$93.3 million
2. United States	\$43.5 million
3. United Nations	\$36.8 million
4. Germany	\$36.2 million
5. Public-Private Partnerships (PPPs)	\$21.8 million
6. the Netherlands	\$18.7 million
7. Norway	\$15.4 million
8. Sweden	\$15.3 million
9. Domestic Funding	\$13.7 million
10. Switzerland	\$10.2 million

\*Ranking does not include RBSA contributions.

Account (RBSA) funds, or voluntary core funding, for 2020.

### Voluntary funding highlights in 2020

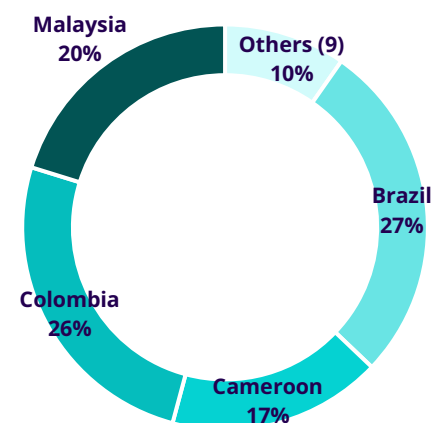

- Average annual approvals have steadily increased since 2010. Total approvals for the period 2010-2013, on average, totalled US\$238.0 million per year. For the period 2017-20, average annual approvals reached US\$ 374.7 million thanks to record-setting years in 2017 and 2019.
- The European Commission became the biggest contributor to ILO's voluntary funding in 2020. Its support is focused primarily on ending child labour in seasonal agriculture in Turkey as well as meeting the decent work needs of refugees and host communities as part of responding to the Syrian refugee crisis and those of migrant workers in multiple different global supply chains.
- For multi-bilateral approvals in 2020: 23.0% were contributed by the United States, 19.1% by Germany, 9.9% by the Netherlands, 8.1% by Norway and 8.1% by Sweden. The largest part of multi-bilateral funding is invested in ending child labour and forced labour as well as employment promotion, especially employment-intensive investment, and improving labour standards in global supply chains. While an important potential funding source for resource diversification, non-OECD-DAC countries constituted just over one percent of all multi-bilateral approvals.

\*EU category includes contributions from Other inter-governmental organizations (OIGO). These account for less than 1% of the category.

- Accounting for 53 per cent of total approvals in 2020, multi-bilateral development partners remained the largest source of voluntary funding, buoyed by the large contributions of the United States and Germany, followed by the European Commission (26%). The United Nations (10%) PPPs (6%), and Domestic Development Funding (4%) round out the top five sources of voluntary funding for 2020.
- UN approvals reached US\$ 36.8 million in 2020 – more than US\$ 5 million above the average recorded over the past four years. The UN portfolio is also marked by an increasing number of Joint Programmes/Multi Partner Trust Funds (MPTFs), which represent 57% of total UN funding to the ILO in 2020. The main areas of focus are supporting COVID-19 response, as well as several global programmes, in the thematic areas of employment promotion (25.6% of UN funding), enterprise promotion (21.0%) and work quality issues (20.4%).
- PPP approvals totalled US\$21.8 million in 2020, which marked a 40 per cent increase from 2019. This included a significant increase in support from Foundations, particularly the Bill and Melinda Gates Foundation, focused on digital labour and labour informality research, as well as important private sector contributions for areas of work including ending child labour and supporting compliance with international labour laws in global textile supply chains through the Better Work Programme.
- Domestic Development Funding continues to play an important role in ILO's voluntary funding portfolio, accounting for more than US\$ 13.7 million of approvals, or about 4% of total funding in 2020. This was thanks largely to contributions from Brazil, Cameroon, Colombia and Malaysia. While this funding volume marks a significant decline compared with 2019, it remains above the historical average despite the budgetary constraints imposed by combatting the COVID-19 pandemic. This funding focused on employment intensive investment and technical capacity building in fields ranging from social protection to improving the application of labour standards.
- In 2020, Governance-related activities attracted the largest proportion of extra budgetary funding (32.6%) led by a strong increase in funding for ending child labour ahead of the UN international year for the elimination of child labour. This was followed by Employment promotion (24.5%) and then by Enterprises (13.6%), Social Protection (11.9%) and Work quality (8.4%). In the face of particularly strong interest as part of COVID-19 response, funding contributions for social protection activities increased by more than 25%.
- In 2020, 17.1% of total approvals were for Europe and 16.5% for Africa, followed by Asia (15.8%), the Arab States (9.7%) and the Americas (6.0%). In line with the increase in larger, multi-regional programmes observed in recent years, a significant percentage of resources were also allocated to interregional or global projects (35.0%). While figures for the Americas aligned with the same trends observed in 2019, Approvals for Europe increased by 42% and 34% in the Arab States. In contrast, following record setting approvals in 2019 during which both benefited from the approval of large multi-year

**Domestic development funding contributors, 2020**

programmes, contributions for Africa and Asia declined by more than 70% from close to US\$100 million for each region in 2019 to just over US\$ 55 million in 2020.

- Of the total of extra-budgetary funds approved in 2020, 38.4% was financially managed by headquarters and 61.6% by the field. This distribution represents a five-percentage point increase for the field compared to 2019, where 55.7% of approvals were managed by the field. This can be explained in part by the particularly large global projects approved in 2019. Such projects are often coordinated at headquarters, with funds to be disbursed to regional and national offices through sub-projects.
  - ▶ In the Africa region, activities are mainly focused on employment promotion and governance issues, particularly ending child labour and forced labour as well as promoting occupational safety and health (OSH).
  - ▶ In the Americas region, projects focus on addressing governance issues, including ending child labour and forced labour and promoting OSH. Employment promotion was also a regional priority.
  - ▶ In Europe and Central Asia, there was a strong focus on addressing child labour and forced labour, with a multi-year project of more than US\$33 million supported by the European Union in Turkey dedicated to the elimination of the child labour in seasonal agriculture.
  - ▶ In Asia and the Pacific, activities are mainly focused on addressing governance and work quality issues, including promoting OSH as well as supporting safe and productive labour migration.
  - ▶ In the Arab States region, projects focused on promoting employment opportunities through employment-intensive investment and skills development, with such initiatives receiving more than 50% of new funds in 2020. Promoting OSH and addressing the decent work needs of refugees and host communities were also prominent focus areas.

The following tables provide more detailed information about total voluntary non-core funding approvals in 2020. Many of the tables also provide a comparative overview of approval data for the period 2017-2020. Information is presented by source of funds, partner category, technical field, geographical distribution, administrative responsibility, and a combination of all of the above. For information about voluntary core funding contributions, please refer to the information available at [this link](#).
