OVERVIEW

Far from being mere beneficiaries of the 2030 Agenda for Sustainable Development, young people feature among the architects of its development and continue to engage with the frameworks and processes that support its implementation, follow-up and review.

As the Decade of Action calls for accelerating sustainable solution pathways to the world's biggest challenges, it is important to continue including youth in their design and implementation.

This calls on youth eager to pursue an international career to acquire skills necessary to bring about change and to support efforts aimed at helping achieve the Sustainable Development Goals (SDGs).

A United Nations training institution and training arm of the International Labour Organization, the ITCILO invites participants to the Winter 2023 edition of its Global Youth Forum – an experiential learning platform bringing youth at the forefront of efforts aimed at supporting the 2030 Agenda for Sustainable Development and achieving its Sustainable Development Goals (SDGs).

LEARNING AIMS

The Winter Global Youth Forum guides participants through the core concepts and practical methods to:

- **Leverage** existing **SDG synergies** for the design of an international SDG-impact career and the ideation of sustainable development projects;
- **Develop soft skills** to visualise, design and pursue an **international career** (in the public, private sector, or as an entrepreneur) grounded in helping achieve the SDGs;
- **Embed** SDG achievement in a **group project proposal** that can be implemented at the regional, national, or local level.

METHODOLOGY

The Winter Global Youth Forum is a **two-week online course of 40 learning hours**.

These feature live webinar sessions and asynchronous learning activities participants complete either individually, or in groups.

Online webinar sessions are highly participatory, featuring activities designed to foster peer-to-peer interaction and collaborative learning. Over the course of the Forum, participants set the building blocks of a Group Project Proposal and a final Group Presentation respectively submitted and delivered on the final day of the Forum.

Learning materials (webinar links and recordings, preliminary or supplementary course readings, assignments and self-guided modules) are available on the ITCILO e-learning platform, the [eCampus](#).
