

Promoting Jobs, Protecting People

# DIALOGUE ON CLIMATE CHANGE AND JOBS

## Shaping the COP21 Agenda of Solutions

Tuesday 12 May, 10.00-12.00

Venue: ILO, Room II, R3 South

Event languages: English and French, with simultaneous interpretation provided.

The forthcoming 21<sup>st</sup> UN climate change conference (COP21) in Paris this year will be a critical and historic moment to reach a universal new climate agreement that enables the international community to act with a long-term vision of a climate neutral world in the second half of the century.

Given the scale, complexity and urgency of the challenge of climate change, on the one hand inclusion and decent work, on the other, it is clear that the world will neither have the resources nor the time to tackle them separately or consecutively. Taking a holistic approach to confront these challenges is not an option, but a necessity. Actors in the World of Work - governments, employers and workers' organizations have a key contribution to make for the global community to secure a meaningful and universal climate change agreement this year in Paris. More importantly, they will be indispensable to ensure its implementation. (See Conclusions of the International Labour Conference 2013 and the report on Sustainable development, decent work and green jobs).

By addressing climate change and putting the planet on a deep de-carbonization path, we have a unique opportunity to deliver a safer, healthier and more prosperous world by creating decent, sustainable jobs for tens of millions of people and making social inclusion a reality around the globe.

You are cordially invited to a dialogue organised by the ILO in collaboration with the Geneva Environment Network Secretariat. This event aims at providing a platform for sharing views and perspectives on ways in which the climate change and decent work agendas can be made mutually supportive, looking towards the United Nations Framework Convention on Climate Change COP21 (Paris, 30 November – 11 December 2015). Participants, who will include experts in environmental issues and climate change as well as tripartite representatives from the world of work, will discuss **means for contributing to the COP21 "Agenda of Solutions"**.

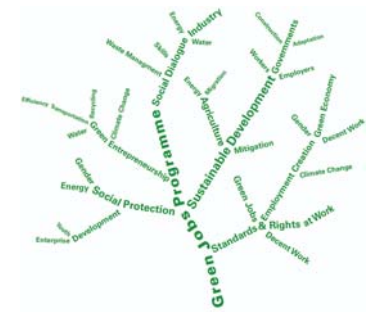

The dialogue will also serve as a stepping stone in the approach to the 104<sup>th</sup> Session of the International Labour Conference (Geneva, 1-13 June 2015), at which the World of Work Summit (Thursday, 11 June 2015) will be on Climate Change and the World of Work.
